December 2018

Dear Parent/Carer

Launch of Doddle Parent App

At the start of the academic year, we launched Doddle as our new home learning platform. Feedback from parents/carers has been positive, as Doddle has meant it is easier to support and monitor the completion of home learning tasks. Regular student panels this term have shown that Doddle is helping students to independently complete work and revise class learning. Therefore, I am delighted to inform you that Doddle have been working on an app which is now available to download.

The app can be downloaded by both students and parents/carers on the Google Play store and the iOS App store. To find it, simply search for 'Doddle Learn' and download the app free of charge. When downloaded, students and parents/carers use their existing logins to access the app. Students and parents/carers need only log in once, meaning no more forgotten passwords. The app will send daily notifications allowing students and parents/carers to stay up to date with upcoming and due homework.

If you experience any problems accessing Doddle or using the Doddle App, please do contact your child's Head of Year.

Yours sincerely

Martin Paine
